		B:	480
		T:	430
Packing data	Weight	kg	13,5
	Volume	m ³	0,16

Base equipment

Benefit

Backrest	Ergonomically designed, high backrest to take the strain off the spine and muscles. This is achieved by means of its special shape: wide at the bottom and narrow at the top.	The backrest optimally supports your lumbar region whilst allowing your arms and upper body the space and freedom they need higher up in order to move around.
	Backrest height adjustment convenient and easy to handle in sitting position.	The amount of the support can be provided in accordance with the user's body size.
	Height adjustment scale integrated.	Helps to recover the optimum adjustment quickly (for example at shift work).
Seat	Ergonomically designed, extra high seat.	The seat automatically encourages the correct posture and upright, healthy sitting.
	With integrated pelvic support, rounded front edge and non-slip bulge.	The round front edge of the seat prevents blocked circulation in the thighs. The non-slip bulge prevents slipping forwards. Thus, the seat is completely utilized and the supporting contact to the backrest will be assured.
Seat and backrest design	Polypropylene: Sintec is equipped with robust plastic seat and backrest shells in basalt grey (RAL 7012) (Upholstery see Accessories).	Robust, suitable for every working condition. Easy-care.
Seat height	Stepless seat height setting from 430 - 580 mm supported by safety gas spring with protective cover.	Seat height can be adapted to nearly 95 % of all body sizes, the cover protects the gas spring from dust and dirt.
Technology	Permanent contact backrest with additional adjustable seat inclination	This mechanism ensures that the backrest responds immediately to any movements of the upper body by following them. Thus, the back remains supported all the time. The backrest can also be locked into any tilt position if required. There is a continuously variable mechanism for tilting the seat forwards. This ensures that your posture remains relaxed even when you need to bend forwards into your work. Less pressure is exerted on the thigh area, which encourages steady circulation. The problem of sitting all hunched up is masterfully avoided thanks to a mechanism that ensures a minimum angle of 90° between your legs and upper body at all times.
	Quick adjustment	Every function can be operated comfortably and easily in sitting position.
	Anti-Shock lock	The backrest cannot accidentally spring forwards even after the lock has been released.
Base	5 star base made from steel shape tube, powder-coated, basalt grey (RAL 7012). Flat design.	Very high stability, longevity. Flat design prevents stumbling hazard.
Glides	Wearproof plastic glides with a large surface area.	Offer a superb level of stability.
Materials	The materials used are recyclable.	Environmentally friendly.
